

Announcing AXSMessenger – September 2007

AXSMessenger is now live and online!

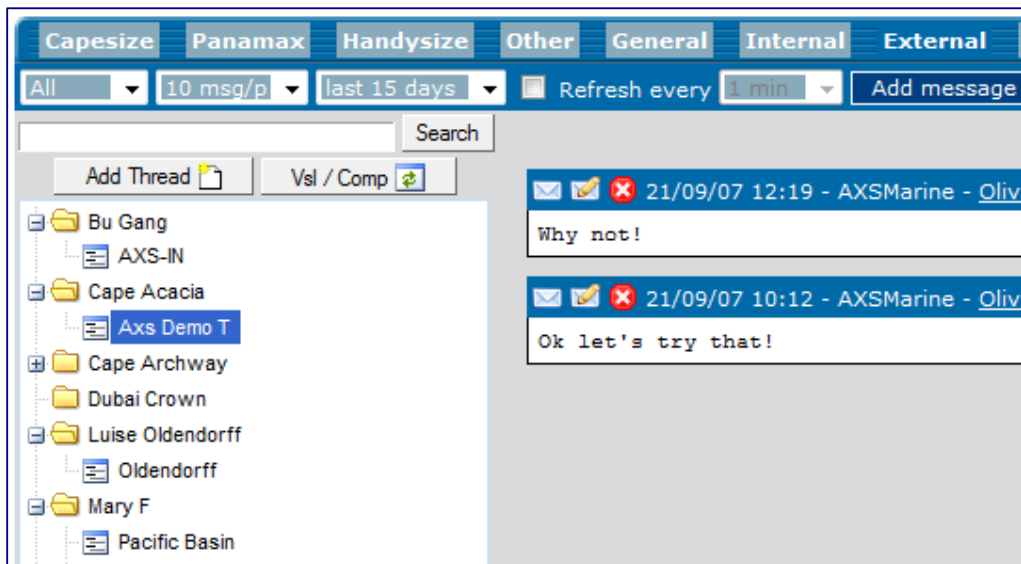

Save time and boost efficiency by using a chat messenger specifically designed for your business needs. Cut out unnecessary chatter in other messaging systems – focus on finding and chartering vessels.

AXSMessenger is a communication tool that links AXSMarine members to each other. All your conversations are securely stored and searchable.

You will be notified in search results when you receive a message from another member on that vessel.

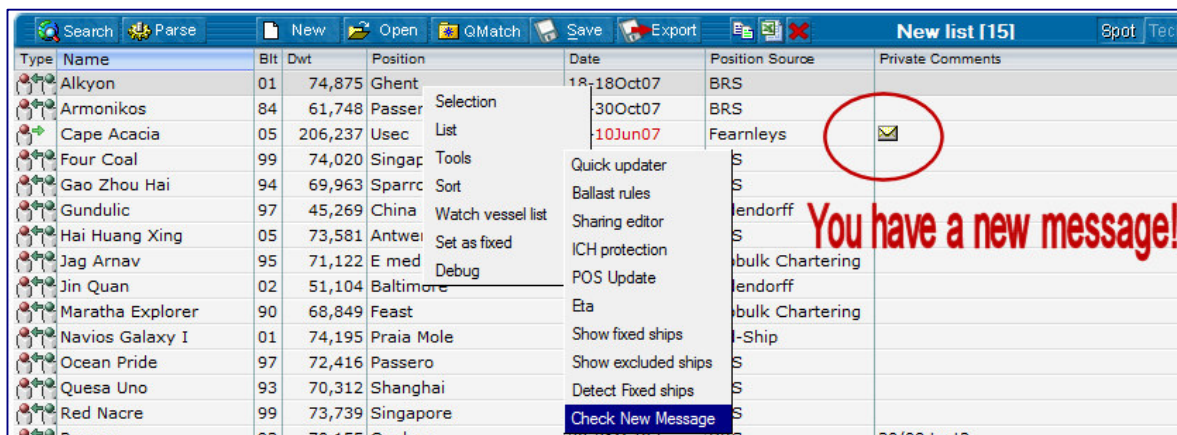

See for yourselves – give this new tool a try!

1. Select "MyAXS" from the top menu
2. Select "Message board"

3. Select the "External" tab
4. Press "Add Thread"
5. Select a company and vessel name
6. Write your message and post it

- In order to notify the message's recipient, an envelope is automatically displayed on the vessel comment field when doing a vessel search or with a simple right click then Tool/Check new messages.

- Simply click on the envelope to access your message.
- You may toggle between sender (Comp) and vessel (Vsl) and set your filter to better manage and filter your messages.

AXSMarine produces a complete set of interactive, Internet-based decision-making tools and databases for shipping industry professionals. AXSMarine online tools are secure, fast and easy to use, and the databases they source are always up to date. Because they are Internet-based, services are available from any computer, anywhere; there is nothing to download or install.

With AXSMarine, shipping industry professionals can transform a massive overload of raw data into useful, searchable information. As a result, they can work faster, manage more efficiently and plan better.
