

AXSMarine

For Immediate Release – November 28, 2007

AXSMarine releases AXSDry Voyage Calculator 3.0

***New version of popular tool enables quick estimations
in addition to detailed calculations***

Paris, France, November 28, 2007 – AXSMarine, provider of online databases, reference guides and tools enabling shipping industry professionals to transform raw data into useful, searchable, easily manageable information, announces the **release of version 3.0 of its renowned AXSDry Voyage Calculator.**

AXSDry Voyage Calculator 3.0 is an interactive tool allowing brokers and charterers to quickly and easily take multiple factors into consideration when performing voyage estimations, such as vessel technical details including speed and consumptions, port draft and DAs, canal costs, route options, bunker and passage ports and distances, bunker prices, and more. Results are immediately available on the same screen. Calculations can be saved and stored, and even safely and securely shared with colleagues or business partners.

Users of AXSDry Voyage Calculator can work faster, manage more efficiently and plan better.

Like all of AXSDry's interactive tools, AXSDry Voyage Calculator draws upon AXSMarine's extensive set of up-to-date knowledge databases.

AXSMarine Commercial Director Stephen J. Fletcher comments, "This new version incorporates requests for features and functions made by our users, and provides them with the benefits of the latest Internet technologies. Shipping professionals can use it to make 'quick and dirty' estimations as well as detailed and complex ones — all in a very fast and user-friendly interface."

A full list of the new release's features can be found on the company's web site at www.axsmarine.com. Companies wishing to benefit from a free trial should contact AXSMarine.

About AXSMarine

AXSMarine produces a complete set of interactive, Internet-based decision-making tools and databases for shipping industry professionals. AXSMarine online tools are secure, fast and easy to use, and the databases they source are always up to date. Because they are Internet based, services are available from any computer, anywhere; there is nothing to download or install.

With AXSMarine, shipping industry professionals can transform a massive overload of raw data into useful, searchable information. As a result, they can work faster, manage more efficiently and plan better.
