

## Product Information Sheet

AXSDry's vessel Manager is a searchable and sortable database allowing you to manage your own open positions lists as well as market positions. To enter your positions and cargoes in a quick and simple way AXSMarine has developed several easy-to-use tools.

### Position Entry

#### 1. POSITION UPDATER

Enter a ship and automatically see what are the latest positions that have been entered for this ship (so you do not update it twice if one of your colleague already did). Keep it open in a popup at the bottom of your screen to update positions any time in the day

Vessel Name	Blt	Dwt	Type	Position	Zone	Open Dates	Pos Contact 1:	Updated	
Spar canis	06	53,565	Handymt						Save
Spar Canis	06	53,565	Hdymax	Fangcheng	Se asia	16-18Apr	Axsmarine - OB	02Apr07	
Spar Canis	06	53,565	Hdymax	Lanshan	Feast	14-20Mar	Say hong kong - SF	13Mar07	
Spar Canis	06	53,565	Hdymax	Japan South	Feast	05-10Feb	Say hong kong - SF	08Jan07	

#### 2. QUICK UPDATER

Additional to basic position details you can add Private comments, commercial contact, TC Owner information and activate sharing
